MemoVue

WEDDING COLLAB

Every guest's photos, one album.

A disposable camera for your wedding, on every guest's phone. Nobody sees a photo until the time you choose. Then the whole album opens at once.

HOW IT WORKS

Three steps, zero effort.

01 **Share one code**

Put the QR on the tables or in the family group. Guests scan and start shooting. No app, no sign-up.

02 **Everyone shoots**

Each guest gets a set number of shots, like a disposable camera. Every photo is sealed the moment it's taken, even from whoever took it.

03 **It all opens at once**

At the time you pick, the morning after or a week later, the whole album reveals together, each photo credited to whoever took it.

WHY NOT GOOGLE DRIVE?

Because nobody uploads after a wedding.

01 **Nobody uploads later**

A Drive folder waits for guests to upload after the wedding, and most never do. Here, photos land in the album the moment they're taken.

02 **Nothing to set up for guests**

No Google sign-in, no folder link, no sharing permissions. One scan and they're shooting.

03 **A reveal, not a folder**

Drive fills up one upload at a time. MemoVue stays sealed, so guests stay in the moment, and you open everything together, like picking up prints.

TRY IT

Be a guest at a sample wedding.

Open the invitation your guests would see, and take a shot. Thirty seconds.

Open the sample

THE COLLAB

A simple barter.

YOU GET

MemoVue for your wedding, free, for up to 500 guests. We help you set it up.

WE ASK

One feed post and one story, both tagging @memovue.official. Photo, carousel or reel: your call.

HOW IT GOES

Message us your wedding date. We send your code and help you set up the roll. You post after the reveal.

The parts you missed.

You can't be in every room at your own wedding. Your guests are.
